Philosophy

To build software that empowers people through accessibility, sensitivity and careful, professional development practices.

Experience

Macropod ✶ Oct. 2014 – Feb. 2016
Developer
As part of a team, built and maintained multiple web apps using modern web technologies. Maintained several supporting React modules, PostCSS plugins and dev tools. Helped to standardise and formalise internal code structure. Consulted with designers to ensure Macropod could execute on designs and to provide high quality products.

Movideo ✶ May 2013 – Oct. 2014
Front-End Developer
Primary contributor to a complex, AngularJS responsive web application. Lead front-end developer for multiple client websites. Maintained a JS/Flash video playback library with demanding cross-browser and cross device support goals. Implemented new features and extensive bug fixes. Led a major refactor to modernise the library.

George Patterson Y&R ✶ Apr. 2012 – May 2014
Digital Developer
Responsible for the planning and deployment of new projects, including speccing database structures, defining scope and producing documentation. Contributed to the agency's existing PHP and ASP .NET web apps. Deployed new features, content, testing and bug fixes.

Technologies

HTML & CSS ✶ JavaScript ✶ React.js
Angular.js ✶ Responsive Design ✶ SVG
PostCSS ✶ SASS ✶ CSS Animations
Webpack ✶ ASP.NET with C# ✶ Node.js
Version Control (Git, Subversion)
Continuous Integration (e.g. Buildkite)
Database Programming (MS / MySQL)

Industry

Viewport Trickery ✶ Sep. 2015
A MelbJS talk about putting responsive, mobile-friendly UIs atop desktop-only sites.

Decentralizing Diversity ✶ May 2015
A CampJS panel about the JavaScript community and its responsibility to its diverse members to maintain a welcoming environment.

Education

Curtain University ✶ 2011
Bachelor of Science
(Computer Science) (Incomplete)

Central TAFE ✶ 2008 – 2009
Diploma of Information Technology
(Database Design & Development
/ Programming)

✶ ✶ ✶
